

Business & Technology Tools and Services

*Focused on
Empowering
Your People for
Business Challenges*

Northcross Group (NCG) is a professional services firm that helps organizations take on some of the toughest business challenges. Mergers & Acquisitions, Cybersecurity, Risk Management, Compliance, and supporting Program Operations are major undertakings for any organization. These challenges require coordinated efforts between disparate groups across the enterprise to be successful. NCG brings the capabilities and tools to drive these efforts with tailored solutions that are a best fit for your organization, industry, and objectives.

In today's world, solutions are not simply business or technical considerations, but a combination of the two. Success requires a combination of operational, program, and technical components to come together. Key to this are the people that will help make things happen and the processes that will guide their efforts.

Technology is essential to almost every aspect of an organization, but people are still the foundation. When working with a clients, we focus on providing guidance and expertise to empower people for success. Our service model is focused on using the right mix of people, process, data, and technology to deliver business value.

Our programmatic approach helps our clients build capabilities and frameworks that foster sustainability and scalability for the future. Our program functions and processes are designed to evolve as new factors, needs, tools, and parties come into play. They are structured to help drive organizational culture to drive program objectives on a daily basis.

NCG Service Model

Addressing people, processes, data, and technology to deliver on business objectives such as integration, cybersecurity, risk management, and compliance.

NCG Services

The NCG Team is comprised of experienced practitioners that are ready to roll-up their sleeves to help your team get the job done. We start by figuring out what will provide the most value within your organization and help your team operate successfully. We plan out the effort and see what tools, skills, and support will be most effective in delivering success. Importantly, when efforts are complete, we measure effectiveness and identify possible improvements for the future.

Mergers & Acquisition

We work with clients across the acquisition life cycle from due diligence, deal modeling, integration, and operational transition. Having provided for integration program management for over 25 deals in the past ten years, we tailor our tools and accelerators to meet the specific needs of clients and their objectives.

Risk Management

We help our clients implement or improve enterprise risk management and governance processes and systems to provide better insight and measurement of potential exposures. We provide third-party risk assessments, and help tailor remediation roadmaps that make the best business case.

Compliance & Oversight

We help our clients develop and enhance their internal compliance management capabilities. We leverage closed loop assessment and analysis tools and processes to develop insight and target efforts ranging from design to performance across the entire enterprise.

Cybersecurity Programs

We help our clients get their arms around the wide range of elements related to security. We help design and implement complete cybersecurity programs that improve the overall security posture and evolve as needs change.

Incident Management

We provide our clients management and remediation services for system incidents and data breaches. Our communication and collaboration tools help keep stakeholders on the same page and minimize documentation burden in dealing with key third parties and law enforcement.

Policies & Procedures

We help our clients craft and maintain meaningful process frameworks to keep their organizations on track. With interactive automation, we ensure policies and procedures are tailored, effective and compliant in facilitating efforts.

Deployment Management

We help our clients plan, test, and execute system deployments where the risk of impact to internal and external customers is significant. Our methods and tools connect people, tasks, and plans to provide integrated incident and risk management functions.

Vendor Management

We help our clients across their third-party relationships with external vendor risk and value management. We design and implement tools and processes to garner traceability and insight of key partners from initial vetting to separation.

Program Development & Program Office Support

We provide our clients with program and project management services to drive and execute initiatives that have major system and business impacts.

System Blueprinting

We help our clients capture and model their enterprise systems and processes to support value mapping, platform replacements, conversions, and system improvements.
